• Description:

The user-interface of this dash cam is simple and straightforward and it is easy to mount to your windscreen.

The dash cam can record high-quality AVI footage and it has a G-sensor to automatically protect footage that has been recorded when a collision or accident has occurred. Infrared LED lights allowing the dash cam to be used when driving at night.

The dash cam also features parking monitoring mode that enables the dash cam to automatically turn on and record footage when a collision has occurred. And similar to the G-sensor feature, the footage is protected from being deleted.

NOTE: Recording quality depends from the class of the memory card. Full HD Video Recording and HD Still Consecutive Recording required Class 10 card. Class 2 is suitable for standard video quality, HD is supported on cards from class 4 to 6.
