

3.3kVA - 110v Transformer

EC45

• Material:	GRP (Glass Reinforced Plastic)
• Description:	Robust and high-performance power solution designed for construction sites, engineering projects, and industrial worksites. This transformer is equipped with twin 16A 110V outlets, allowing multiple power tools to operate simultaneously. The inclusion of a 1.5m input cable provides flexibility in placement, while the 13A BS plug ensures compatibility with standard power supplies. The unit is built to handle high power loads, making it a reliable choice for professionals working with saws, drills, grinders, and other high-powered tools. IP44 rating making it suitable for outdoor and harsh environments.
• Cont. Rating:	1650VA
• Tool/Intermittent Rating:	3000VA
• No. of Outlets:	Twin 16A 110V
• Cable Length:	1.5m
• Net Weight:	15.5kg
• CTN Measurement:	270x240x290mm
• Input/Output Voltage:	230V AC Single Phase/110V AC
• Plug:	13A BS
• Product Size:	244x200x266mm
