

M8 Chimney Nuts

CN4

Description:

Designed for forming gasket joints where an extremely high temperature resistance is necessary. Typical applications include motor vehicles, domestic appliances, electrical equipment and machinery. Used on door trims, roof linings, interior door panels, motorbike fairings, dashboards etc. No special tools are required to mount U-nuts, and they can be assembled much more quickly and easily than conventional nuts.

Finish:

C45E Steel

Nut size:

M8

Plate size:

24.8 x 16.7mm ± 0.2mm

Panel Thickness:

1mm (±0.05mm)

Finish/Colour:

Geomet
